Naguanagua, Carabobo, Venezuela

Mobile: +58 414 430 9079

Professional Summary

Full-Stack Engineer with e-commerce and platform experience, targeting **Data Engineering** and **DevOps** roles. Focused on reliable data workflows, ETL/ELT pipelines, analytics-ready data models, and secure delivery practices. **Data Engineer** focused on robust ETL/ELT pipelines, analytics-ready data models, and trustworthy datasets for decision-making. Experienced working in enterprise contexts with emphasis on maintainability, governance, cross-team alignment, and secure delivery practices.

Technical Skills

Programming Languages: PHP, JavaScript/TypeScript, Python, SQL

Frameworks: Laravel (primary), Vue.js, FastAPI, NestJS, Express.js, Nuxt.js, Angular, Livewire

Databases: PostgreSQL, MySQL, MongoDB, Redis

DevOps/Cloud: Docker, CI/CD (GitHub Actions / GitLab CI), Linux, Windows Server

Professional Experience

Senior Full Stack Engineer (Remote)

Crazy Imagine Software – Client: Little Taller

Dec 22, 2025 – Present

Remote

- Built an E2E notifications system and support workflow in **Laravel + Vue**, including de-duplication, reminders, observer pattern, and **HubSpot** form integration.
- Delivered a **Inertia.js + Vue** Knowledge Base with taxonomy, search, Markdown rendering, and admin exports via **Laravel Nova**.

Full Stack Developer / Development Consultant

TIENDAS DAKA C.A.

Oct 2024 – Dec 2025

Naguanagua, Venezuela

- Led 15 developers and delivered 6+ key projects in close coordination with stakeholders.
- Recovered and optimized an e-commerce stack with **NestJS + Strapi**; built a technical support platform with **Laravel/Express** backend, **Livewire** frontend, and **Flutter** mobile app integrated with SAP.
- Built a sales quoting platform (**Laravel/Filament**) for mobile and tablets, integrated with SAP and delivered with a 3-person team.

Freelance Developer

Self-Employed

Dec 2023 – Dec 2024

Remote

- Improved performance and stability across **WordPress/WooCommerce**, **Nuxt**, and **CS-Cart**.
- Assessed, evaluated and recovered a headless e-commerce with **Odoo (Python)** backend and **Nuxt** frontend.

Full Stack Developer / Programmer

BIOMERCADOS C.A.

Nov 2022 – Nov 2023

Valencia, Venezuela

- Maintained a multi-platform e-commerce (30,000+ users) and headless architecture with **Magento 2**.
- Designed and deployed CI/CD with Docker for **Express** APIs and **Angular PWA** (nginx).
- Performed RFM analysis for customer segmentation and business decisions using SQL queries and data processing.

Education

Romulo Gallegos' Experimental University (UNERG)

Information Engineer – Magna Cum Laude

2016 – 2021

Guarico, Venezuela

IBM DevOps and Software Engineering Professional Certificate

Coursera – IBM Skills Network

2026 – Present

In progress
