Naguanagua, Carabobo, Venezuela

Mobile: +58 414 430 9079

Professional Summary

Full-Stack Engineer transitioning into **Data Engineering** and **DevOps**, with a track record of shipping reliable end-to-end systems. Recent work has focused on SQL-based segmentation (RFM), web-scraping pipelines and analytics-ready models on **GCP**. Background includes enterprise contexts emphasizing maintainability, governance and secure cross-team delivery.

Technical Skills

Languages: PHP, JavaScript/TypeScript, Python, SQL, Dart, Java

Frameworks: Laravel (primary), NestJS, Express, FastAPI | React, Next.js, Vue, Nuxt, Angular, Livewire | Flutter

Databases: PostgreSQL, MySQL, MS SQL Server, MongoDB, Redis

DevOps/Cloud: Docker, CI/CD, Linux, Windows Server, AWS (S3, RDS, ElastiCache), Proxmox VE

Tools: Git, Postman, Jira, GitHub Copilot, Claude, ChatGPT

Professional Experience

Senior Full Stack Engineer (Remote)

Dec 2025 – Present

Crazy Imagine Software – Client: Little Taller

Remote

- Built an E2E notifications system and support workflow in **Laravel + Vue**, including de-duplication, reminders, observer pattern, and **HubSpot** form integration.
- Delivered an **Inertia.js + Vue** Knowledge Base with taxonomy, search, Markdown rendering, and admin exports via **Laravel Nova**.
- Replaced fragmented internal tooling with a single Laravel + Vue surface used day-to-day by the support team.

Full Stack Developer / Development Consultant

Oct 2024 – Dec 2025

TIENDAS DAKA C.A.

Naguanagua, Venezuela

- Led 15 developers and delivered 6+ key projects in close coordination with stakeholders.
- Recovered and rebuilt a critical e-commerce platform with **NestJS**, **Next.js**, and **Medusa**, replacing a failing implementation with a maintainable architecture.
- Architected and built a technical-support platform with a **Laravel/Express** backend, **Livewire** frontend, and **Flutter** mobile app, integrated with SAP.
- Built a sales-quoting platform (**Laravel/Filament**) for mobile and tablets with direct SAP integration, delivered with a 3-person team.

Freelance Developer

Dec 2023 – Dec 2024

Self-Employed

Remote

- Improved performance and stability across **WordPress/WooCommerce**, **Nuxt**, and **CS-Cart**.
- Assessed, evaluated and recovered a headless e-commerce with **Odoo (Python)** backend and **Nuxt** frontend.

Full Stack Developer / Programmer

Nov 2022 – Nov 2023

BIOMERCADOS C.A.

Valencia, Venezuela

- Maintained a multi-platform headless e-commerce (30,000+ users) with **Magento 2**, an **Angular PWA**, and an **Express API**.
- Designed and deployed CI/CD with **Docker** and **Nginx** for the Express APIs and the Angular PWA.
- Performed RFM analysis on order data with SQL to inform customer segmentation and commercial decisions.
- Automated daily exchange-rate ingestion via web scraping, replacing manual entry and improving the accuracy of pricing decisions.

Education

Universidad Nacional Experimental Rómulo Gallegos (UNERG)

2016 – 2021

Information Engineer – Magna Cum Laude

Guárico, Venezuela

IBM DevOps and Software Engineering Professional Certificate

2026 – Present

Coursera – IBM Skills Network

In progress
